Glossy PEO + Matte PEI printing platform board

Dual-use functionality for versatile switching

Cost-effective

Easy to demold

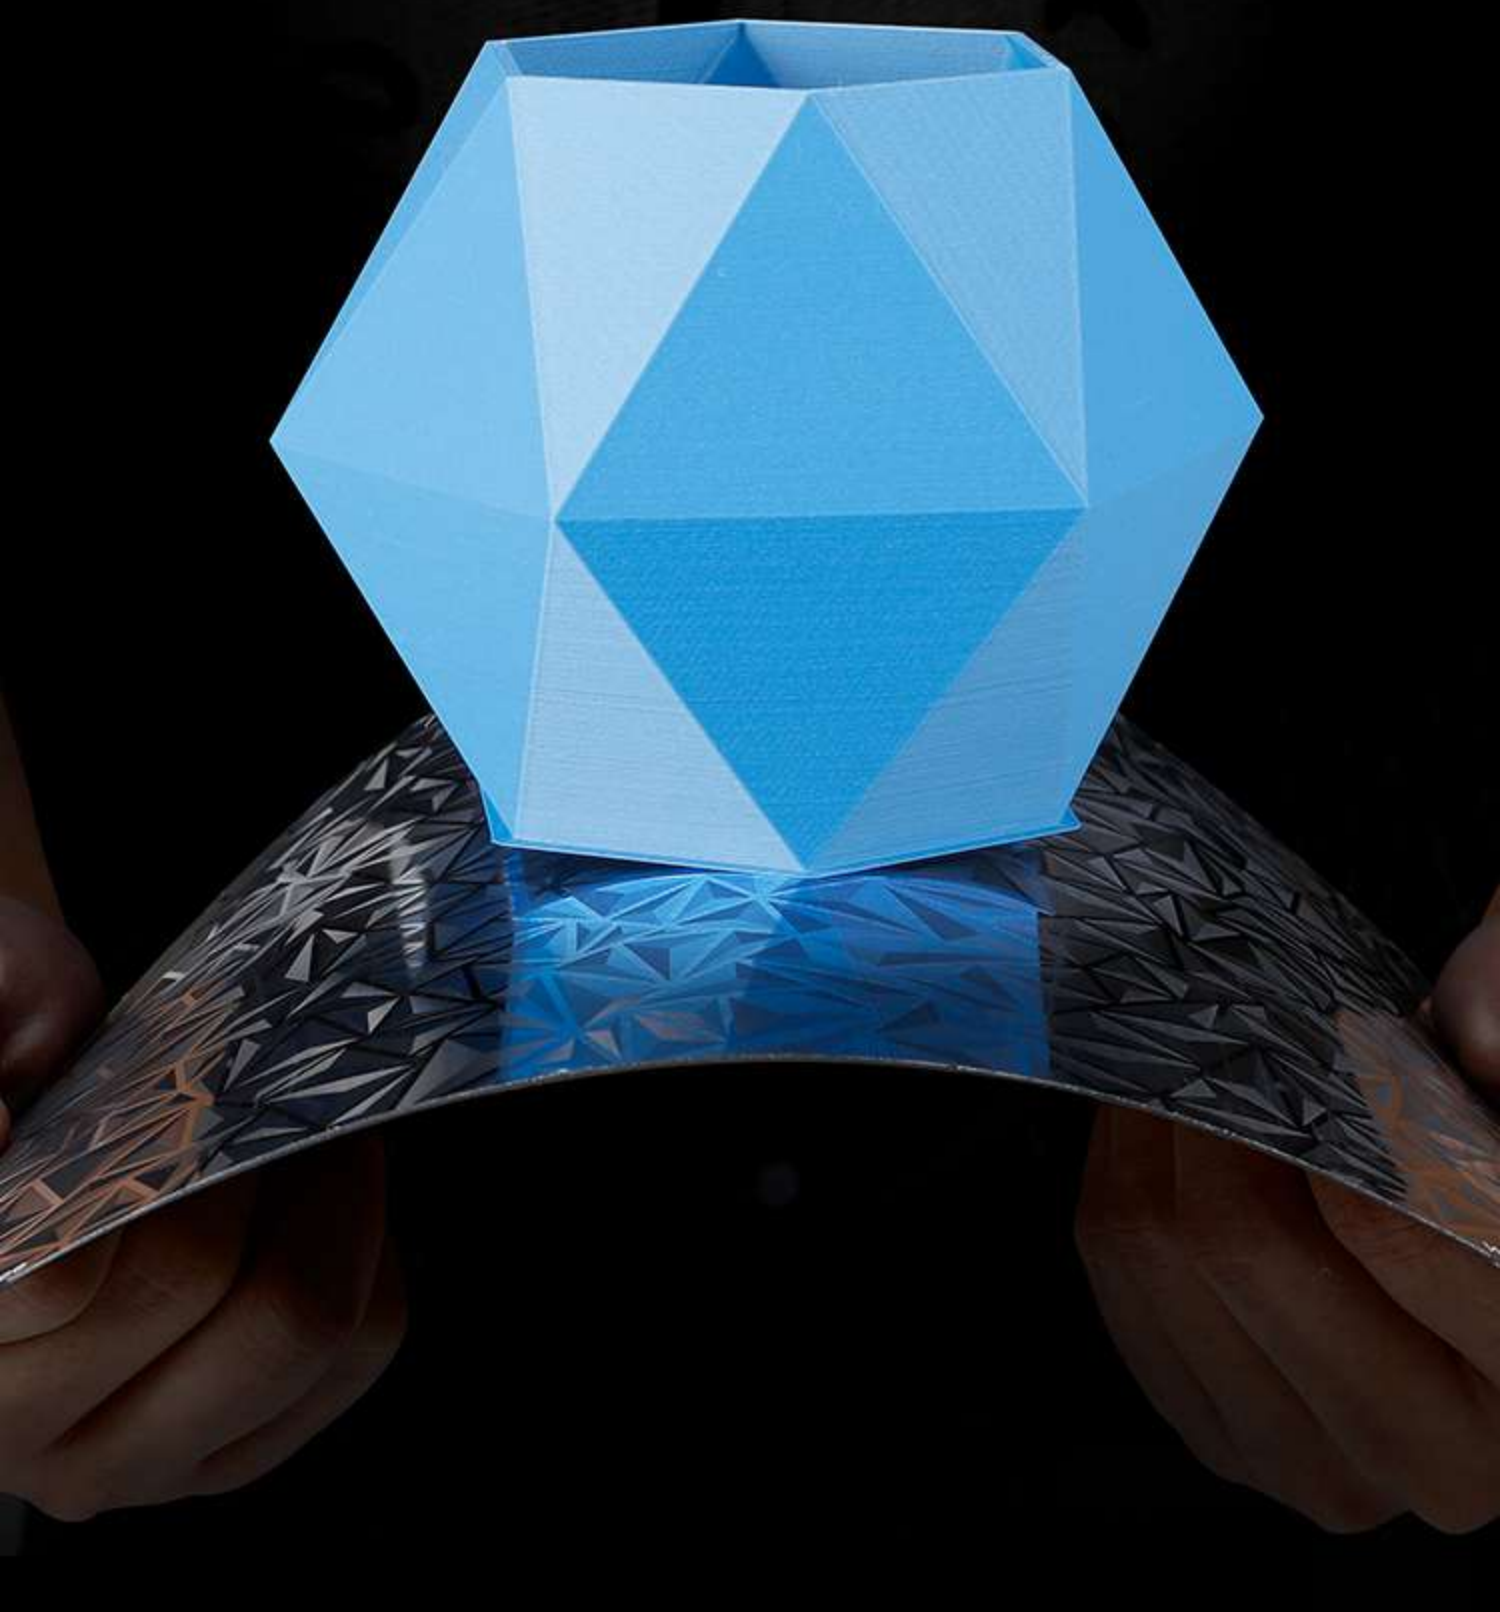

Highly flat

Wear-resistant and durable

High flatness, easy demolding

High-flatness spring steel sheet with excellent elasticity, remains undistorted after repeated bending, facilitating demolding.

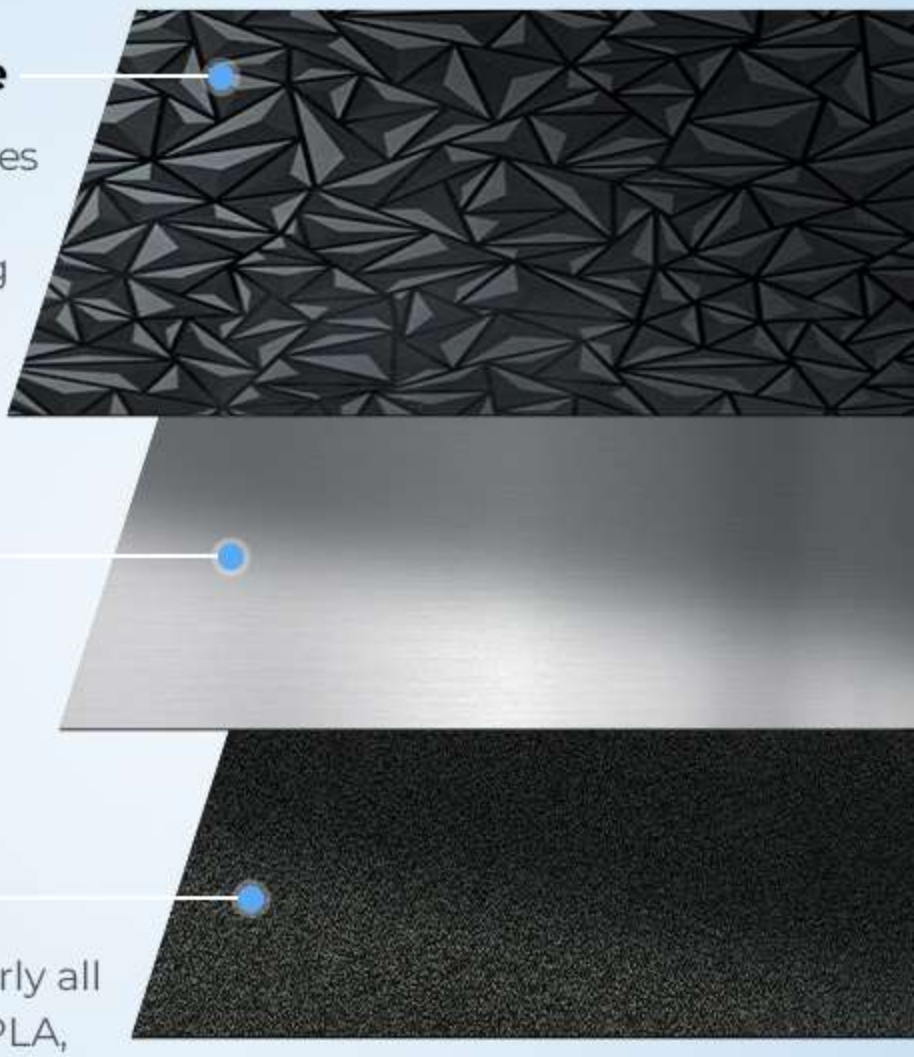

High adhesion, stable molding

Thin spring steel sheet with surface adhesion to high-adhesion materials, to reduce inertia during platform movement for smoother 3D printer operation.

PEO sticker surface

can withstand temperatures of approximately 80°C; recommended for printing PLA_PETG_TPU

0.4mm

Thin spring steel sheet

Matte PEI surface

suitable for printing nearly all mainstream filaments: PLA, PETG, ABS, TPU, ASA, PET, PA, PC, etc.

Product Specifications

Product Name:	Dual-Sided Printing Platform Board Kit – Glossy PEO + Matte PEI
Compatible Models:	K1 Max
Size:	310×315mm
