Laser Engraver Enclosure Pro

Dustproof and Smokeproof

Efficient Smoke Exhaust

Easy to Operate

Protect Health

Enclosed Design to Isolate Smoke and Dust

The closed structure effectively isolates 99% of the smoke and odor during engraving and cutting, bringing you a cleaner working environment.

Exhaust Smoke and Dust Purify the Air

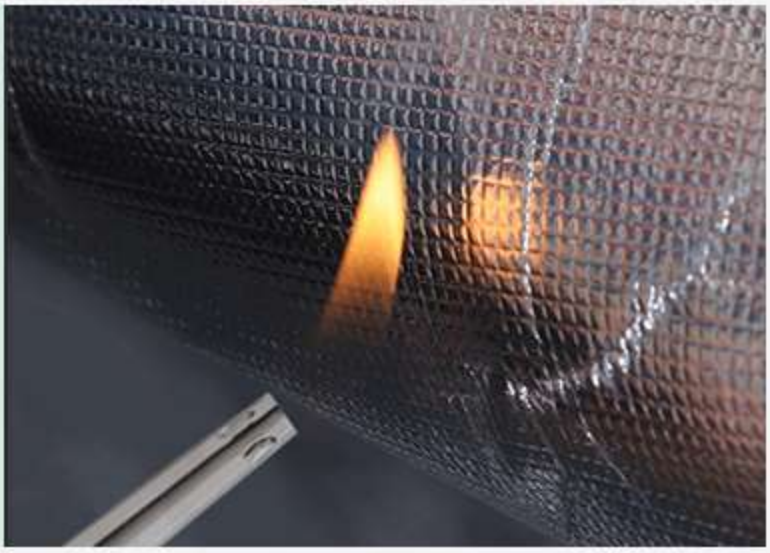

The smoke exhaust device uses a 4000 RPM high-efficiency ventilation fan, which can quickly extract the smoke, particles, and odors generated during work to keep the indoor air fresh.

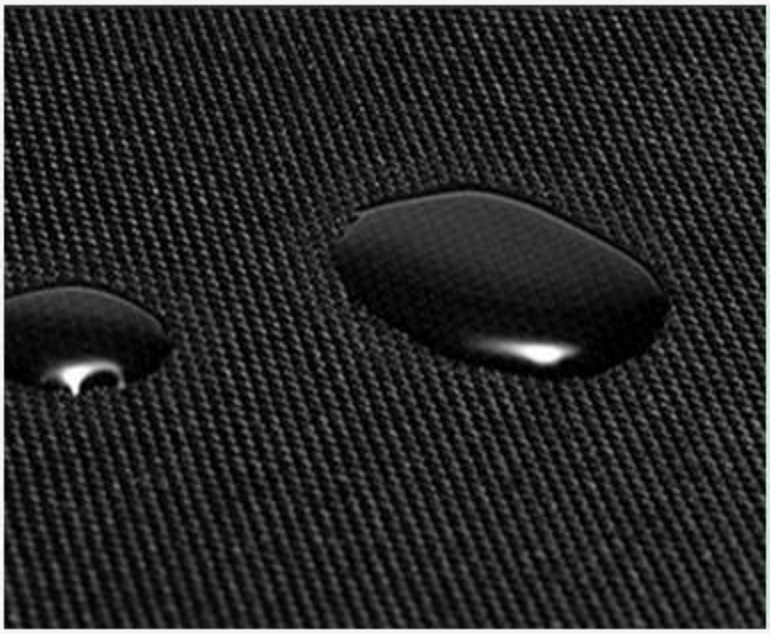

Waterproof and Fireproof Stable and Reliable

Support structure of high-strength steel pipe, with high-quality flame-retardant fabric, not only waterproof and fireproof, but also stable and reliable.

Fireproof

Waterproof

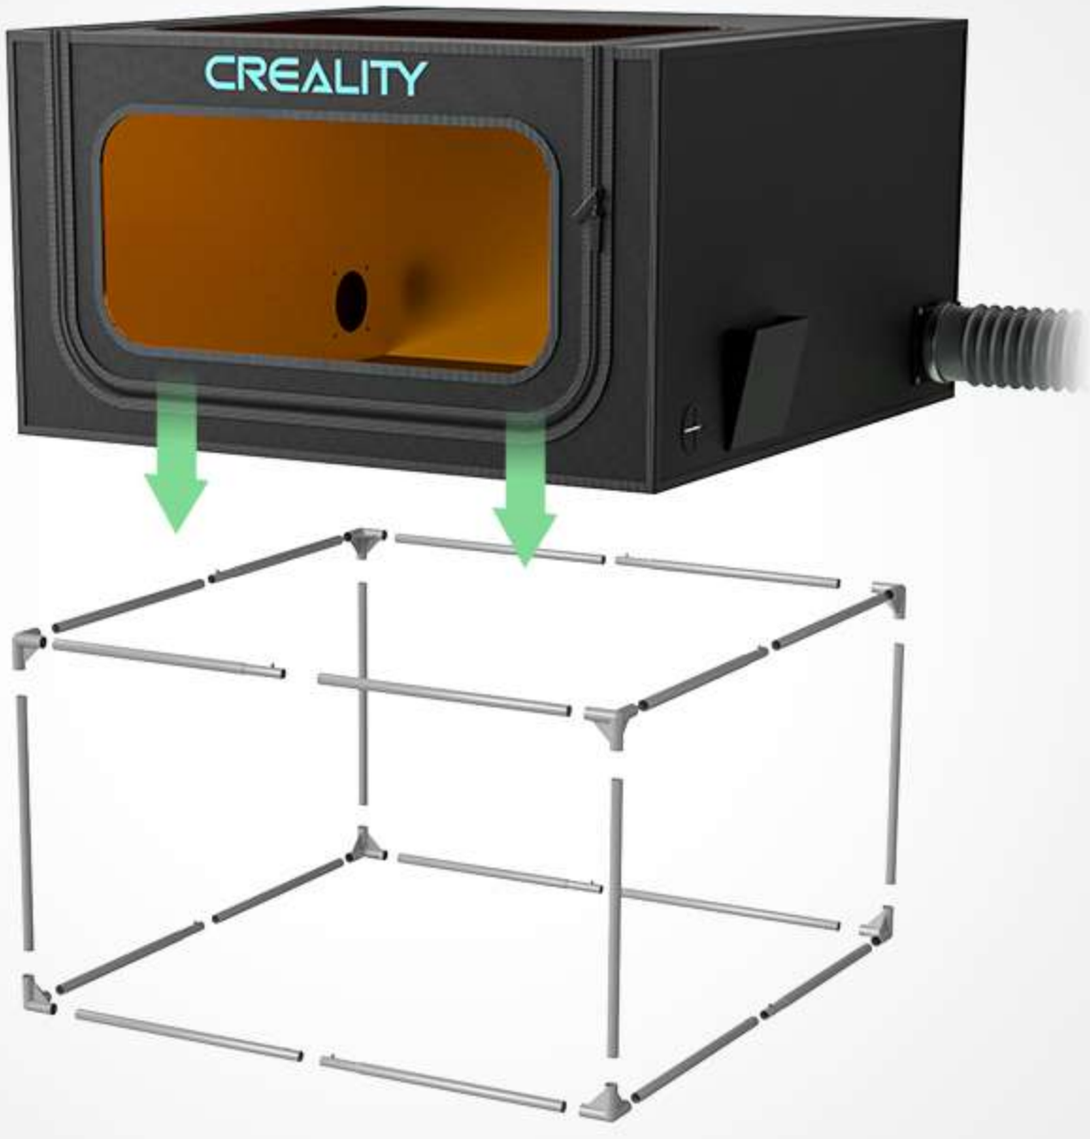

Dual-view Window Design for Easy Observation

Unique dual-view window design and anti-blue light PVC material, easy to observe the engraving progress at any time.

Folding Storage, Easy to Operate

Foldable assembly design,
easy to operate and save space

Larger Size, Wider Compatibility

Large space and wide compatibility allow you to install the rotary roller to meet more engraving needs.

720*720*400mm

Product name: Laser Engraver Enclosure Pro
Material: flame retardant fabric
Fan speed: 4000RPM
Product size: 720*720*400mm
Packing size: 415×240×125mm
