Honeycomb Workbench for Laser Engraver

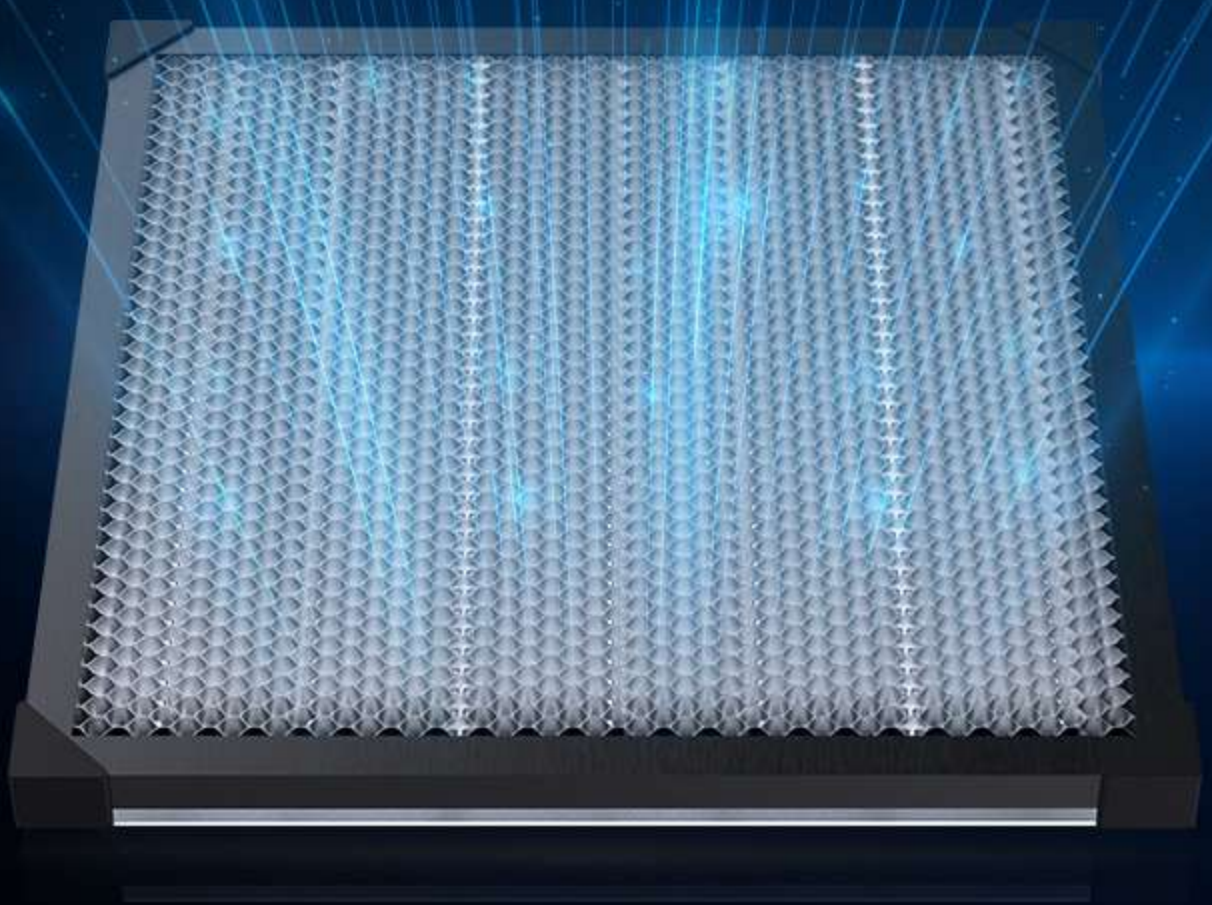

Protect Desktop, Improve Creation

Better Heat Dissipation

Larger Working Area

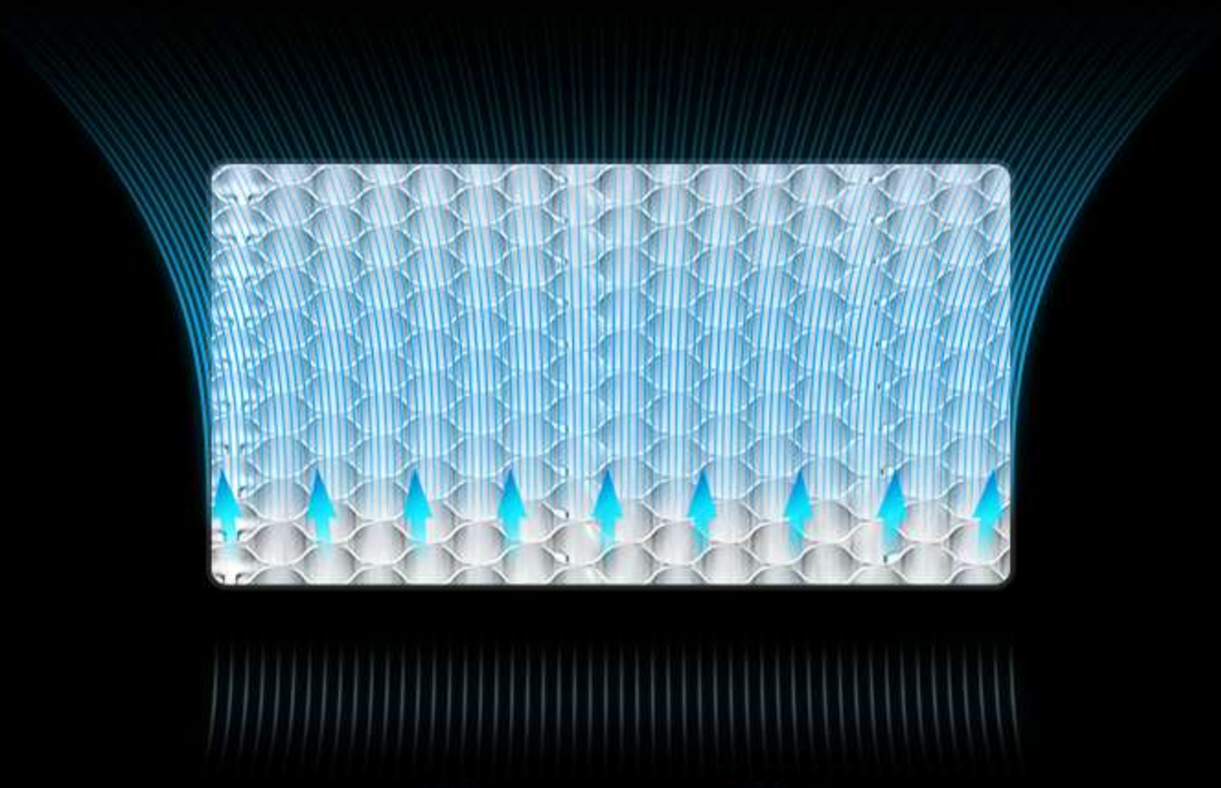

Double Desktop Protection

Thick All-Metal Structure

Better Heat Dissipation

8mm large-aperture honeycomb design contributes to faster heat dissipation and exhaustion of smoke, which prevents fire and your works from yellowing.

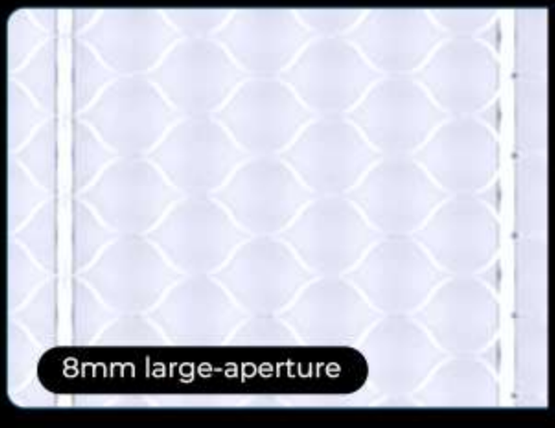

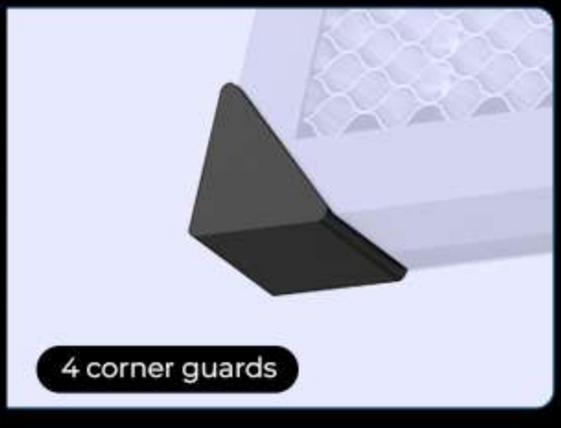

Clean surface

Yellowed surface

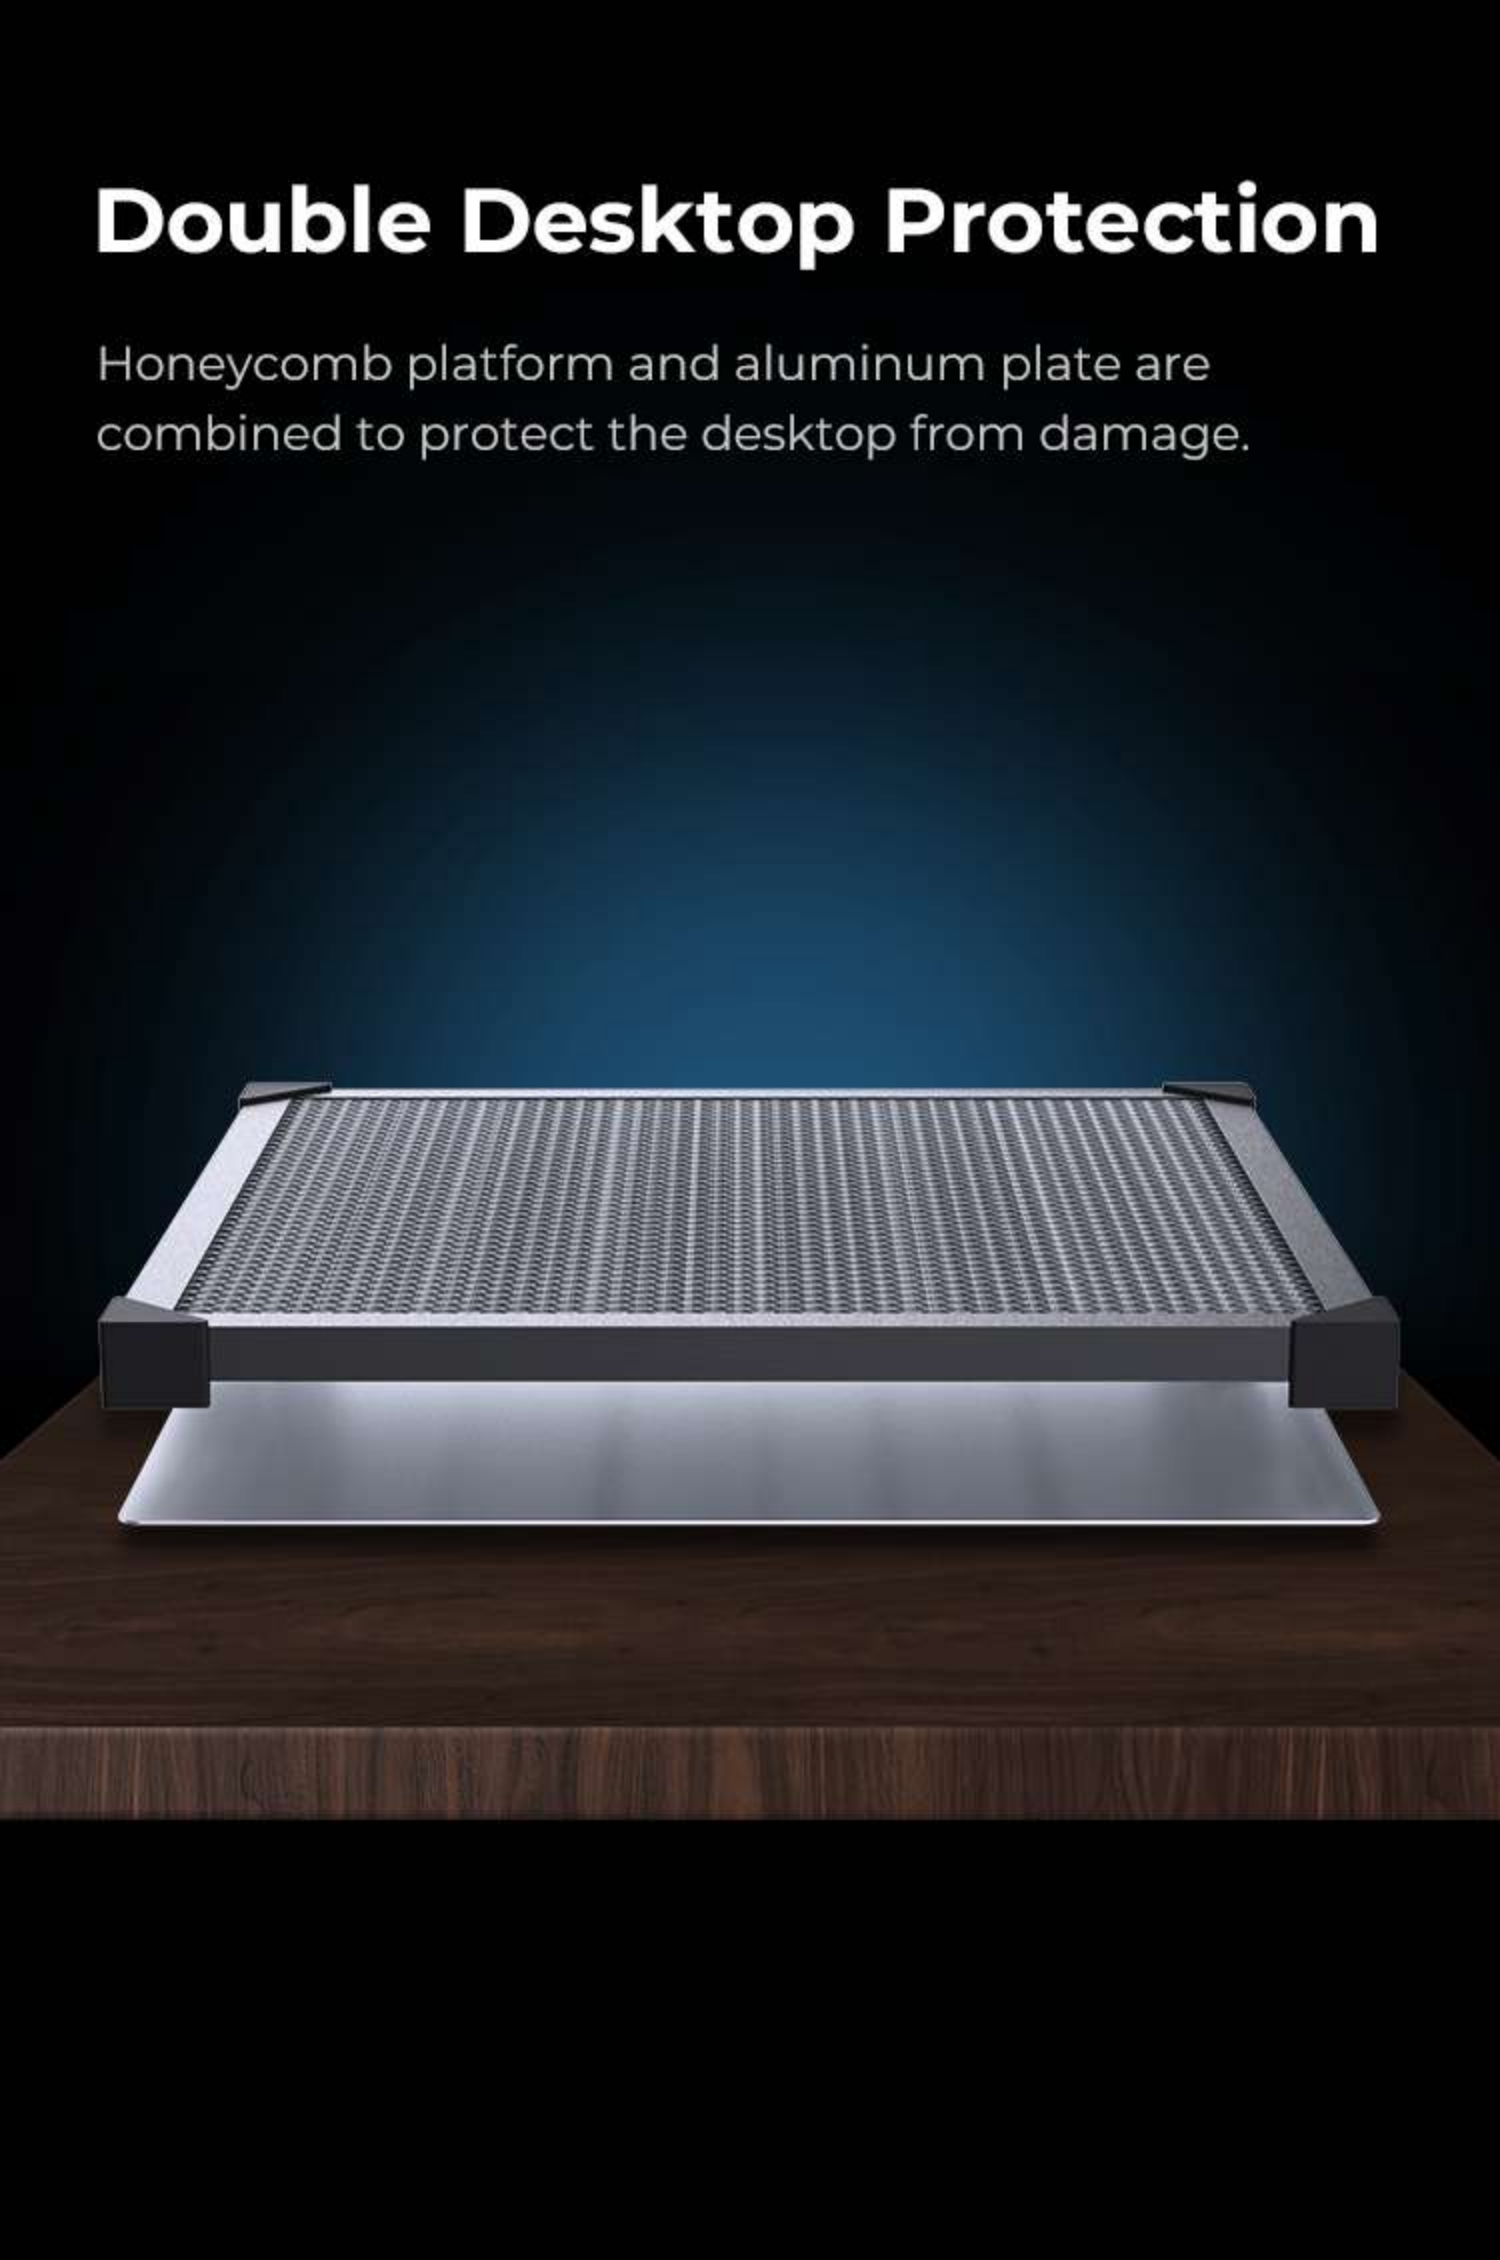

Larger Working Area

It supports a maximum working area of 456*456mm, allowing you to unleash your creativity with ease.

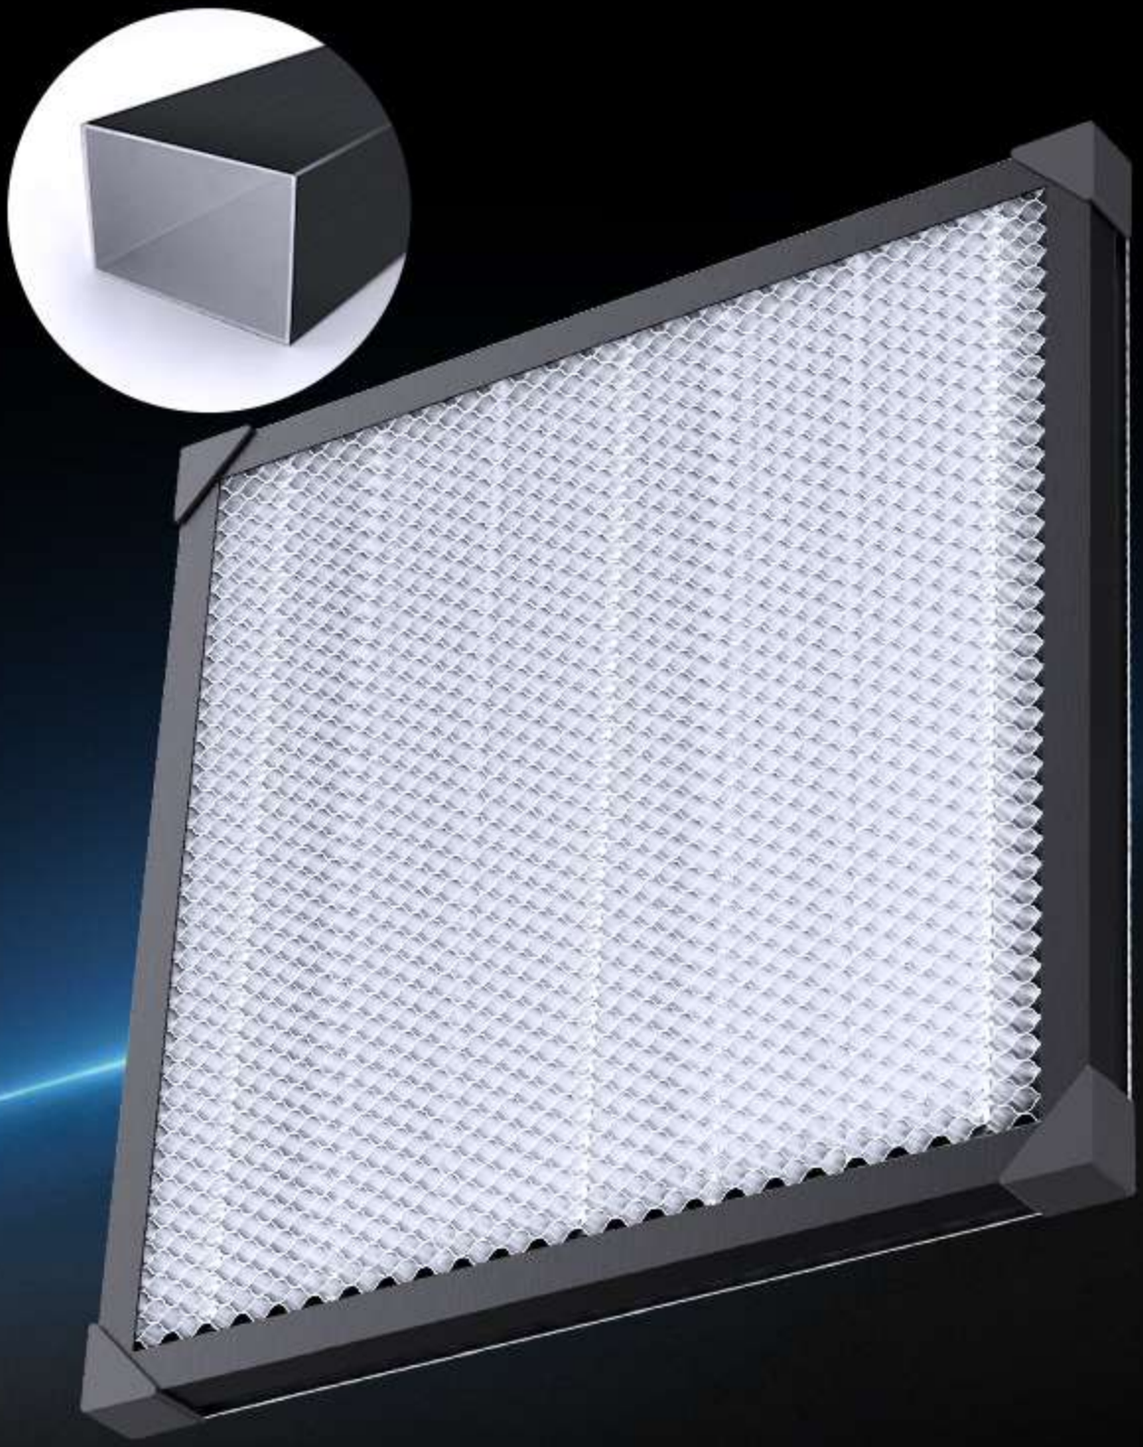

Double Desktop Protection

Honeycomb platform and aluminum plate are combined to protect the desktop from damage.

Groundbreaking Integrated Air Assist

Manually adjust the air assist steplessly through the knob, or it can automatically adjust the airflow through LightBurn, to remove smoke and protec the laser lens, bringing a cleaner result.
