The 8K HDMI Cable is certified by an HDMI Authorized Test Center and undergoes rigorous compliance testing to verify support for all HDMI 2.1 high-bandwidth features. It is EMI-tested to ensure minimal interference with nearby wireless signals. This cable works with all 8K ready devices and is backward compatible with previous HDMI specifications.

Route this HDMI cord easily around corners, behind displays, between desks and other equipment with a flexible, halogen-free TPE jacket and robust connector strain reliefs. Aluminum-Mylar foil with braided shielding minimizes EMI in dense setups and shared spaces.
