USB-C to VGA Adapter - 1920x1200 - TAA

Product ID: CDP2VGASA

This is no ordinary video adapter. Yes, it enables you to connectthe USB-C port on your computer to a VGA display or projector, but it also features a unique Presentation Modeswitch. When you turnon this switch, the adapter prevents your computer from launching its screen saver, going to sleep or entering power save mode. The adapter ensures that your screen will always stayon, making it the perfect USB-C video adapter for any presentation or meeting.

When you deliver a presentation, your goal is to engage with your audience, not your computer. But, if you don't move yourmouse soon enough, or change your power settings, your screen goes black due to inactivity while you're addressing the audience. This can be a major distractionwhen you're trying to focus on the message you're communicating.

This adapter prevents screen disruptions with Presentation Mode, a unique feature that automatically initiates occasional cursor movement to prevent your computer’s power settings from interrupting your presentation. It’s perfect for sharing websites, drawings, spreadsheets, PDFs or slide shows during your meeting.

You can turn Presentation Mode on or off, depending on your application. Turn it on when you're in the boardroom and want your screen to stay on, and turn it off when you’re using the adapter at your workspace or office desk, to enableyour computer's original power settings to take effect. Using the toggle switch is easy, and saves you the hassle of constantly making adjustments in your operating systemsettings.

To ensure easy operation and installation, this unique adapter is natively supported on Windows and Mac computers. It’s easy to connect the adapter using the versatile USB Type-C port on your computer. The reversible USB-C connector means you will always plug it in correctly on your first try, saving you the hassle and distraction of repeatedly attempting to connect your laptop to a display or projector.

The adapter supports video resolutions up to 1920x1200 or 1080p. You’ll be surprised at the picture quality the adapter provides, even when you connect it to a legacy VGA projector or television. The adapter harnesses the video capabilities that are built into your USB Type-C connection to deliver every detail in stunning high-definition.

The CDP2VGASAis backed by a 3-year StarTech.com warranty and free lifetime technical support.

Certifications, Reports and Compatibility

Applications

• Be ready to present from your laptop, with the peace of mind in knowing your laptop won’t enter power save mode when you don't want it to

• Keep this adapter with you while you travel to ensure you can connect to any VGA display you come across

• Connect a VGA display to your USB-C laptop to use as a secondary monitor

Features

• Equipped with a Presentation Mode feature to ensure your video output is not interrupted by your computer’s power saving modes

• Avoid the hassle of adjusting power settings, with an easy-to-use toggle switch that lets you turn Presentation Mode on or off

• Works on Mac and Windows computers

• Support for HD video resolutions up to 1920 x 1200

• Hassle-free connection with the reversible USB-C connector
