SEAL FIXX™

STOPS SEAL LEAKS FAST

LUBEGARD® SEAL FIXX™ is an industrial strength and cost effective stop leak that works quickly. This unique formula will lubricate and revitalize worn or dried out seals safely without causing harm to internal components.

LG-FIXX SEAL FIXX IS COMPATIBLE WITH:

- Conventional and synthetic ATFs, motor oils, power steering fluids and automotive and industrial hydraulic fluids
- Diesel and gasoline engines
- Perfect for industrial and farming applications that require hydraulic fluid such as jacks, tractors, plows, lifts, etc.

MULTI-PURPOSE STOP SEAL LEAK WORKS IN:

Engines – including main seals
Power Steering Systems
Automatic and Manual Transmissions
Differentials

BENEFITS

- Quickly stops seal-related leaks
- Easy to use
- Maximum strength formula
- Fast acting formula
- Economical seal leak repair and treatment
- Effective on all rubber seals and gaskets

Directions: Bring system to normal operation temperature. Add LUBEGARD SEAL FIXX to system, making sure that the total volume does not exceed the maximum fill level. Do not use in empty system. One 8-ounce bottle will treat a 6-quart capacity system. Adjust usage based on capacity. Normal treat rate is 1.3 to 1.5 ounces per quart.

DISCLAIMERS: If leak persists after several hours of operation, seek professional consultation. Not effective on components that are cracked, torn, or excessively damaged. Does not contain petroleum distillates. Not compatible with brake systems.
