

WARNING

- It is recommended to charge for 5 hours before first use, and it's necessary to charge it before the power is exhausted at least once a month to protect its lifespan.
- When using strong light, do not irradiate the eyes directly, as the brightness light will harm the eyes.
- Daily life waterproof, do not submerge it into water directly.
- Do not disassemble, repair, process, or modify this product, as this will damage the flashlight.
- In case of long time idling, battery shall be taken out and kept in cool and dry place.
- Regarding products, each numerical value [lumen, waterproofness, charging time, lighting range] may be slightly different depending on the measurement method.

SPECIFICATION

Name	USB LED Flashlight	Brand	HOPLET
Light Source	XML-T6	Lighting Distance	500M (MAX)
Lumens	1000LM (MAX)	Waterproof Grade	IP65 Life waterproof
Material	Aluminum alloy	Charging Time	About 3-4 hours
Net Weight	168g (Include Battery)	Operating Temperature	-15°C-65°C
Battery	1×18650 Battery (Included)		
Dimensions	Diameter 1.38(Top)* 0.98(Bottom)* Zoomable Length 5.7-6.5 Inches		
Package Contents:	1×US-H167 LED Flashlight, 1×18650 Battery (Inside Flashlight), 1×USB Cable, 1×Operation Instruction		

OPERATION

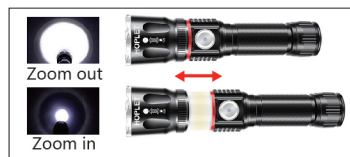

• Turn On / Off, Switching Modes

Press the switch button to Turn On/Off or Switch 4 Modes: High/Low/Strobe/COB lantern. Please note that 2 seconds long press to switch the COB lantern, whichever mode, 10 seconds later press the switch to turn off.

- Stretch the flashlight's body slowly to zoom in and zoom out the ray.
- Zoom Out: Floodlight for large area illumination.
- Zoom In: Spotlight for long range observation.
- Avoid stretching too hard in case of damage to the flashlight.

TAIL MAGNET

There is a strong magnetic base on the flashlight bottom which can be attached to metal surface and platform. This unique design allows you to place it wherever you need it; no need to depend on anyone. Make your hands-free.

BATTERY INSTALLATION

The 18650 battery is built in the battery case. To prevent battery power consumption during shipping, the battery case has an insulation sheet. Be sure to remove the battery insulation sheet before use, otherwise it will not light or charge. Please pay attention to the positive and negative electrode, the positive electrode to the head of the flashlight.

① Remove the tailcap by turning it counterclockwise.

② Remove the insulation sheet in the battery box.

③ Screw the tailcap by turning it clockwise.
