ACOUSTIC HOOD

MAIN FEATURES

The JR-TH-03 Acoustic Hood, made from cold-rolled steel, combines aesthetic appeal with exceptional strength and durability to withstand noise, impact, freezing temperatures, corrosion, high heat, and flames. It is ideal for high-noise environments such as ships, offshore platforms, power plants, substations, and petrochemical facilities, providing up to 18–25dB of noise reduction.

- Suitable for indoor/outdoor use, waterproof, dustproof, and UV-resistant
- Contain an inside lamp
- Noise reduction with door Up to 25dB
- Noise reduction without door Up to 18dB
- The holes on the backplate can be reserved upon request, and the maximum load is 30kg
- Floor-mounted installation
- Optional colors and dimension available upon request
