## CONCRETELINK - Concrete Mounted Anchor

- ConcreteLink anchor with SafetyLink's Abseiling Eyebolt is a fall arrest rope access anchor.
- The tapered concept enables the eyebolt to withstand a live load without activating the bending motion that occurs when arresting a fall.
- Must be chemically fastened, recommended chemical is Fischer FIS-V.

**Testing for concrete mounted anchor.**
To comply with current Standards each Concrete unit must be tested after installation. Allow required curing time as specified in manual before testing. Test consists of pull out force to 50% of design load of anchorage. ***Note: Drilled-in anchorages such as friction and glued-in anchorages shall be placed so that the shear load is at least twice the tension load. For collared eyebolts this translates to a pull at an angle not exceeding 20 degrees to the surface in which the bolt is installed.***
